*RE: Support for Rowan and Cabarrus County NCSTEM Initiative.*

Dear Mr. Rectanus:

The (name of organization/government, et al), (optional statement of relevance - a believer and investor in K-12 STEM education / workforce development), is dedicated to ensuring our children are prepared for the knowledge-based economy and our changing world. We support endeavors which ensure that our children are provided with a foundation for future success and our community has a talented workforce that can build richer economic opportunities.

We were delighted to learn the Rowan and Cabarrus community was invited to participate in the NC STEM Community Collaborative. (name of institution or We) strongly endorse this STEM initiative. As our community's STEM initiative unfolds and solidifies through the visioning process, we will support the process through participating, championing, advising, giving feedback and / or donating in-kind / cash support.

I wish you well with the NC STEM Community Collaborative in our community and throughout North Carolina.

Sincerely,

Name
